European Journal of Operational Research 70 (1993) 436–437
North-Holland

# Contents Volume 70

1 The use of mathematical programming with artificial intelligence and expert systems (*Invited Review*)
*R.D. McBride and D.E. O'Leary*
16 The regional urban solid waste management system: A modelling approach
*C. Caruso, A. Colorni and M. Paruccini*
31 Designing distribution systems with transport economies of scale
*B. Fleischmann*
43 Simulated annealing for resource-constrained scheduling
*D.E. Jeffcoat and R.L. Bulfin*
52 Vendor selection with price breaks
*S.S. Chaudhry, F.G. Forst and J.L. Zydiak*
67 An explicative model of 'public' interorganizational interactions
*A. Ostanello and A. Tsoukiàs*
83 The principal/agent paradigm: Its relevance to various functional fields
*A. van Ackere*
104 EOQ models for continuously deteriorating products using linear and exponential penalty costs
*O. Fujiwara and U.L.J.S.R. Perera*
115 Complexity of single machine, multi-criteria scheduling problems
*C.-L. Chen and R.L. Bulfin*
126 Optimizing theory of constraints when multiple constrained resources exist
*G. Plenert*

135 Risk-value models (*Invited Review*)
*R.K. Sarin and M. Weber*
150 Planning and scheduling packaging lines in food industry
*G.D.H. Claassen and P. van Beek*
159 Network planning for scheduling operations in air cargo handling: a tool in medium term goodsflow control
*M.A.A.P. Verwijmeren and C.B. Tilanus*
167 A system dynamics model for AIDS policy support in Tanzania
*K. Heidenberger and S. Flessa*
177 Set-up saving schemes for printed circuit boards assembly
*O.Z. Maimon, E.M. Dar-El and T.F. Carmon*
191 Optimal allocation of time in a hospital pharmacy using goal programming
*P. Ghandforoush*
199 A comparison of centralized and decentralized control rules in push-type production ordering systems
*H. Matsuura and H. Tsubone*
212 Approximate solution of a dynamic job shop model with several job classes
*P. Legato*
229 A branch and bound algorithm for symmetric 2-Peripatetic Salesman Problems
*J.B.J.M. De Kort*
244 A multi-objective constrained resource information system project selection method
*M.J. Schniederjans and R. Santhanam*
254 A model for the assignment of candidates to constituencies in a mixed election system
*F. Mason and E.M. Tomasin*
263 On some useful properties of the Perron eigenvalue of a positive reciprocal matrix in the context of the analytic hierarchy process
*B. Aupetit and C. Genest*

**Special Issue on Machine Scheduling Problems**

269 Editorial
*J.N.D. Gupta and C.N. Potts*

0377-2217/93/$06.00 © 1993 – Elsevier Science Publishers B.V. All rights reserved

272 On scheduling to minimize earliness–tardiness and batch delivery costs with a common due date
*J.W. Herrmann and C.-Y. Lee*
289 Minimizing flow time variance in a single machine system using genetic algorithms
*M.C. Gupta, Y.P. Gupta and A. Kumar*
304 A heuristic for the single machine tardiness problem
*S.S. Panwalkar, M.L. Smith and C.P. Koulamas*
311 A note on optimal assignment of slack due-dates in single-machine scheduling
*V.S. Gordon*
316 Algorithms for preemptive scheduling of different classes of processors to do jobs with fixed times
*V.R. Dondeti and H. Emmons*
327 A priority rule for minimizing weighted flow time in a class of parallel machine scheduling problems
*S.T. Webster*
335 Two parallel machine sequencing problems involving controllable job processing times
*B. Alidaee and A. Ahmadian*
342 An approximation algorithm for the $m$-machine permutation flow shop scheduling problem with controllable processing times
*E. Nowicki*
350 The complexity of scheduling jobs in repetitive manufacturing systems
*H. Kamoun and C. Sriskandarajah*
365 Performance of scheduling algorithms for no-wait flowshops with parallel machines
*C. Sriskandarajah*
379 Worst-case analysis of heuristics for open shops with parallel machines
*B. Chen and V.A. Strusevich*
391 Two machine open shop scheduling problem to minimize an arbitrary machine usage regular penalty function
*N.V. Shakhlevich and V.A. Strusevich*
405 On scheduling influential stochastic tasks on a single machine
*K.D. Glazebrook and S. Greatrix*
425 Job selection and sequencing on a single machine in a random environment
*P. De, J.B. Ghosh and C.E. Wells*
432 Some remarks about the 'equivalence' of performance measures in scheduling problems
*Y. Gerchak and M.J. Magazine*
436 Contents Volume 70
